the desired information by Mr. Hardwicke, chairman of the Finance Committee, who explained that the baby bonds fall due September 1st, and that the body represented by him had devised this means of settlement, which meant financial economy to the city in interest.

"I thought \$400,000 of the 4 per cent, bonds were issued," said Mr. Noble.

"That amount was authorized to be issued," replied Mr. Hardwicke, "but that much was not needed and the remaining bonds were destroyed."

The Board then adopted the resolution and also agreed to another authorizing the Finance Committee to borrow \$215,000 under the temporary loan plan, pending the sale of the bonds.

A resolution, offered by Mr. Hardwicke, directing that the sum of \$15,600 be placed to the credit of the contingent fund to pay a judgment recently obtained against the city by Mrs. Matilda Rosenfeld, was also adopted, and the Board adjourned.

speculation at the Stock Exchange to day was almost the reverse of that of yesterday. While the advices from the West in regard to corn were nearly all of the same tenor—namely, that the crop was being materially injured by drought—the operators evidently concluded that the report of damages had been exaggerated by western speculators who are engaged in builing the cereals. The shorts in the stock market, instead of waiting for any further hints from the West, decided to reduce their lines, and hence, after fractional declines at the opening, the leading shares improved anywhere from \(\frac{1}{2} \) to 1 per cent. The Grangers naturally scored the largest gains, as the short interest in them had become unwieldy. Lake Shore was weak, selling down 1\(\frac{1}{2} \), to 129, and closing at 1294. CHICAGO, July 31.—There was far less strength in wheat at the opening to-day than marked the close yesterday. The corn market was off, and as wheat took its impetus from that grain, it quite naturally receded in sympathy. Long wheat was disposed of with as much celerity as possible, not considering the question of profit and loss. The entire session did not indicate any inherent strength, although at the close a moderate rally took place on buying by holders of privibeges. Very little encouragement was derived from the announcement, except that the export clearances had some effect in steadying prices. The primary receipts were the largest for any day since the inauguration of the corn-crop movement. September opened at 53%c.—3c, under yesterday. Cash wheat was in good demand at about steady prices.
